

1 · Grounding

one persona per real
diary record (11,940
persons; households kept)

2 · Variance preservation

between-individual
spread + error
independence (E2)

3 · Decision: two-brain loop

LLM slow brain writes/
rewrites cards; fast-brain
executor lives each day;
habit counters harden

4 · Say-do calibration

recall channel fitted;
price channel a declared
prior (2-3x), tested blind

5 · Evaluation

E1-E7 frozen bars;
placebo estimand; drift
rule; comparator; single
blind firings

the “LLM agent” part — one layer of five
